Trout in the Classroom

HFF brings its own version of the Trout in the Classroom curriculum to fifth-grade students in the Henry's Fork watershed, cultivating understanding of, and appreciation for, the Henry's Fork and its fishery among local residents.

Youth on the Fly

This annual event takes local fifth-graders out of the classroom and onto the river to experience a full day of world-class fly-fishing on the Henry's Fork with professional guides.

College Internship Programs

Since 1989, paid internships with HFF have provided college and high school students with an intimate introduction to the Henry's Fork and its protection, in exchange for providing much-needed assistance to HFF staff during field season. Several of HFF's early interns have returned to serve on the board of directors and champion the protection of the Henry's Fork.
